

Lawns and parks

Plant id sheet

These plant species are commonly found growing in grass on lawns and public places like parks. Keep an eye out in other places, though, because they grow in other habitats as well.

Silene dioica (red campion)

- Pink or deep pink flowers
- Leaf bases join around stem
- Family: Caryophyllaceae

Dactylis glomerata (cock's-foot)

- Tall, tufted grass
- 'Clumped' flowerheads
- Flattened flower stems
- Family: Poaceae

Trifolium repens (white clover)

- Heads of small, white flowers
- Leaves with 3 leaflets (trifoliate)
- Often have pale lines on leaflets
- Family: [Fabaceae](#)

Rumex obtusifolius (broad-leaved dock)

- Basal rosette of large leaves
- Grows taller during flowering
- Spikes of tiny, green flowers
- Family: Polygonaceae
